Through penalties, which include most extra time on the training field being beaten by both staff and sword masters, Charles becomes a champion himself. As he shows signs of extreme intelligence, Charles is led on a dangerous and painful journey to places only the gods know and understand. As he fights demons—undead and worse—to achieve the desire of his heart, Charles makes a necessary decision that destroys his life, causes his exile from his beloved country and asks for praise as a hero. But what no one knows is that at the age of fourteen he is now more powerful and deadlier than ever had expected.
